# the concept of inside out

We have to understand the concept of inside out which is starting from the body inside which is the only real solution considering several conditions : how much the oxidation is going on, how much breaking tissue down and destroying DNA, how much the healthy of the body organs, how much the human tension or relax or depression, what about the diet regime and is the vitamins is sufficient or have vitamins deficiency....ect, many conditions must solve from inside to resist the aging process and keep the cells healthy and looking younger. Also we have to work against the damage of the free radicals resulting from the oxidation must use strong antioxidant from inside the tissue to keep the tissue and the cells bright healthy.

We have in MARHENNE the strongest antioxidants and all extracted from natural source from to keep each cell young and save it against free radicals and to control the oxidation coming from the environment and different wrong meals.

**So** the nutrients and keeping support the body cells by the good balanced vitamins and the smart blend of the finest ingredient that innovated carefully in MARHENNE it is to makes sure always that the body itself from inside is stable enough to save each cell in the best condition. this is only, real and the logic solution for keeping you young and to stopping the aging or at least to slowdown the aging process.

**Not just using the simple or superficial creams which has no noticeable result, it is not like that easy.**
